

**Roundtable 1 on  
Industry-Industry  
Partnership for Advancing  
3R from Market Perspective**

- The industry-industry partnership is an effective way for successful implementation of 3R, but the implementation will be depended on national circumstances and go through step by step.
- Successful implementation of this partnership could be done through providing relevant incentives and support such as development of eco-industrial parks and policy instruments introduced or strengthened to incentivize industrial symbiosis.

## Round table 1

- 3R implementation through industry to industry partnership will obtain some advantages such as financial benefits, and good environmental impacts.
- Strong commitment from all stakeholders including not only industry, ministries and donors but also experts is urgently needed to encourage the implementation of industry to industry partnership.
