

Seventh Regional 3R Forum in Asia and the Pacific

“Advancing 3R and Resource Efficiency for the 2030 Agenda for Sustainable Development”

Adelaide, SA, Australia, 2-4 November 2016

Country Report

(Draft)

< Thailand >

This country report was prepared by the Government of Thailand as an input for the Seventh Regional 3R Forum in Asia and the Pacific. The views expressed herein do not necessarily reflect the views of the United Nations.

Country 3R Progress Report

Name of the Country: THAILAND

Name, Designation and Organization Respondent: Ministry of
Natural Resources and Environment - THAILAND

Other Ministries, Organizations, Agencies contributing to
Country Report:

*Progress and achievements towards implementation of the Ha Noi 3R Declaration
-Sustainable 3R Goals for Asia and the Pacific (2013-2023)-*

With the objective of demonstrating renewed interest and commitment of Asia-Pacific countries towards realizing a resource efficient society, the Fourth Regional 3R Forum in Asia-Pacific in 2013 adopted the good-will and legally non-binding “*Ha Noi 3R Declaration – Sustainable 3R Goals for Asia and the Pacific 2013-23.*” The objective of the Country Reporting is to share among international community various initiatives launched and efforts made (such as new policy instruments, legislations, regulations, institutional arrangements, investments or financing, technological innovation or intervention, partnership mechanisms, such as PPPs, etc.) by the member countries of the Forum in addressing each of the underlined goals of the Ha Noi 3R Declaration. This would not only help the member countries to learn various 3R best practices in place across the region, but it would also help bi-lateral and multi-lateral development agencies, donors, development banks in assessing the sustainable needs and challenges to better devise their existing as well as future capacity building programmes and technical assistance in the areas of 3Rs and sustainable waste management.

We request you to kindly fill in the below table as much as possible with relevant data/information. If additional spaces are required, separate sheets could be attached.

Thank you very much for your kind cooperation.

Secretariat of the Regional 3R Forum in Asia and the Pacific
United Nations Centre for Regional Development (UNCRD)

Email: 3R@uncrd.or.jp

Voluntary Progress/Achievements/Initiatives in Implementing Ha Noi 3R Declaration (2013~2023)

Country Name

THAILAND

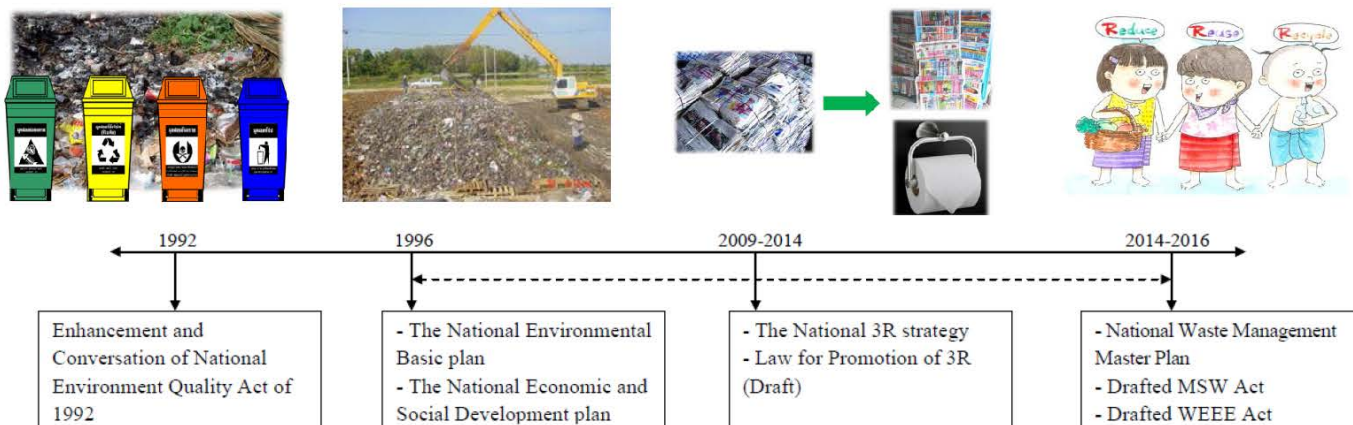

Kingdom of Thailand

Location : Southeast Asia N 13° 44' 0" , E100° 30' 0"

Total Area : 513,115 KM2 Population 67.4 million

Municipal Solid Waste Management

Volume (Million Tons)

Type	Waste Generation (Ton)	Commercial (Ton)	Quantity of Waste Recovery			Utilizations
			Waste Exchange System (Ton)	Total		
				(Ton)	(Percent)	
Glass	3,111,829	933,549	404,538	1,338,086	43	Recycling
	-	-	300,000	300,000	10	Reuse
Paper	4,957,496	991,499	1,338,524	2,330,023	47	Recycling
Plastic	2,340,268	912,704	655,275	1,567,979	67	Recycling
Steel scrap	1,966,558	491,640	1,415,922	1,907,562	97	Recycling
Aluminum	753,238	188,309	263,633	451,943	60	Recycling
Rubber	471,854	33,030	132,119	165,149	35	Recycling
		-	95,000	95,000	20	Reuse
		-	32,000	32,000	7	Alternative Fuel
Total	13,601,243	3,550,731	4,637,011	8,197,742	60	

I. 3R Goals in Urban/Industrial Areas (3Rs in municipal solid waste)

Goal 1 Significant **reduction** in the quantity of **municipal solid waste** generated, by instituting policies, programmes, and projects at national and local levels, encouraging both producers and consumers to reduce the waste through greening production, greening lifestyle, and sustainable consumption.

Q-1 *What specific 3R policies, programmes and projects, are implemented to reduce the quantity of municipal solid waste?*

The National 3R Strategy and plan, Government Green Procurement programme, the National Environmental Basic Plan (2012-2016), Action Plan on Waste Reduction and Separate 2016-2017

Q-2 *What is the level of participation of households in “source” segregation of municipal waste streams?* (Please check the appropriate box)

- Very High (> 90%)
- High (>70%)
- Average (50-~70%)
- Low or not satisfactory (< 50%)
- Does not exist

Q-3 *Total annual government expenditure per capita (US\$ per capita) in municipal solid waste management in 2014-2015*

3-5 USD per capita

Challenges (policy/ institutional/ technological/ financial) faced in implementation:
Need incentives both financial and technical support, challenges in multi – stakeholder cooperations.

Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant

Master Plan on 3R, Zero Waste Project, Government Green Procurement, Clean and green city project: <http://www.pcd.go.th>, <http://www.deqp.go.th>, Action Plan on Waste Reduction and Separate: <http://www.dla.go.th>

Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)

Action Plan on Waste Reduction and Separation, The National 3R Policy and Strategy, The National Municipal Solid Waste Management Plan.

Is this Goal relevant for your country? Highly Partially Not at all

I. 3R Goals in Urban/Industrial Areas (3Rs in municipal solid waste)

Goal 2 Full-scale utilization of the organic component of municipal waste, including food waste, as a valuable resource, thereby achieving multiple benefits such as the reduction of waste flows to final disposal sites, reduction of GHG emission, improvement in resource efficiency, energy recovery, and employment creation.

Q-1 Does the central government have policies or support to utilize or reduce the organic waste such as composting, energy recovery and improving efficiency in food processing?

The National Waste Management Master Plan (2016-2021) which was approved by the Cabinet on the 3rd of May 2016, supports Integrated Waste Management. Within Integrated Waste Management Organic waste can be composted or anaerobic digested to produce biogas and generate electricity.

Q-2 What is happening to country's organic waste?(Please check the appropriate box)

- mostly landfilled
- mostly incinerated
- both landfilled and incinerated
- mostly open dumped or open burned

Challenges (policy/ institutional/ technological/ financial) faced in implementation:

- Inadequate numbers of knowledgeable staff to operate large anaerobic digestion systems.
- Slow growth of private investors and understanding from financial sector.
- Difficulties in obtaining consistent source segregated of organic waste.

Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant

- The waste and Hazardous Waste Management Road Map
http://www.pcd.go.th/Info_Serv/roadmapWaste.html
- The National Waste Management Master Plan (2016-2021)
<http://www.pcd.go.th/Download/file/waste/WasteMasterPlan.pdf>

Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)

Thailand is cooperating with UNEP to address the issue of Food Waste.

Is this Goal relevant for your country? Highly Partially Not at all

I. 3R Goals in Urban/Industrial Areas (3Rs in municipal solid waste)

Goal 3 Achieve significant **increase in recycling rate** of recyclables (e.g., plastic, paper, metal, etc.), by introducing policies and measures, and by setting up financial mechanisms and institutional frameworks involving relevant stakeholders (e.g., producers, consumers, recycling industry, users of recycled materials, etc.) and development of modern recycling industry.

Q-1 What is the recycling rate of various recyclables?(Please check the appropriate cell & add more waste streams as relevant for the country)

Rate \ Type	Very High (>90%)	High (>70%)	Average (50~60%)	Poor (<50%)	Recycling does not exist	Definition of recycling rate*
Paper			✓			1
Plastic				✓		1
Metal	✓					1
Construction waste			✓			1
e-waste				✓		1
others				✓		1

**Note: Please specify in the cell which of the following definitions (ie., 1 or 2 or 3) is followed for recycling rate*

Definition 1: (collected recyclable waste)/(estimated generation of waste)

Definition 2: (volume of utilized recyclable waste)/(volume of raw material)

Definition 3: (volume of utilized recyclable waste)/(volume of collected waste for recycling)

Q-2 What specific policies are introduced at local and national level for prevention or reduction of waste streams – paper, plastic, metal, construction waste, e-waste?

The National Policy and Plan on 3R and E-wastes, Zero Waste Programme, One community one Recycling Program.

Q-3 What is the rate of resource recovery from various waste streams?

Rate \ Type	Very High (>90%)	High (>70%)	Average (50~60%)	Poor (<50%)	Recycling does not exist
Paper			✓		
Plastic				✓	
Metal	✓				
Construction waste				✓	
e-waste				✓	

(Please check the appropriate cell & add more waste streams as relevant for the country)

Q-4 What is the level of existence of resource recovery facilities/ infrastructures in cities?

Level \ Type	Every Major City	Few Major Cities only	Does not exist	Supportive policy or programmes exists	No supportive policy or programmes
Paper	✓				
Plastic	✓				
Metal	✓				
Construction waste		✓			
e-waste				✓	

**Voluntary Progress/Achievements/Initiatives in
Implementing Ha Noi 3R Declaration (2013~2023)**

Country Name

THAILAND

I. 3R Goals in Urban/Industrial Areas (3Rs in municipal solid waste)	
Goal 3	Achieve significant increase in recycling rate of recyclables (e.g., plastic, paper, metal, etc.), by introducing policies and measures, and by setting up financial mechanisms and institutional frameworks involving relevant stakeholders (e.g., producers, consumers, recycling industry, users of recycled materials, etc.) and development of modern recycling industry.
Challenges (policy/ institutional/ technological/ financial) faced in implementation: Need incentive policy for informal sectors, specific law and regulation for waste separation, recovery and recycling, challenges on investment of modern recovery and recycling facilities.	
Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant The National 3R Strategy, Drafted 3R Promotion law, www.pcd.go.th	
Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021) The National 3R Strategy and Law for Promotion of 3R.	
Is this Goal relevant for your country? <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

I. 3R Goals in Urban/Industrial Areas (3Rs in municipal solid waste)	
Goal 4	Build sustainable cities /green cities by encouraging “ zero waste ” through sound policies, strategies, institutional mechanisms, and multi - stakeholder partnerships (giving specific importance to private sector involvement) with a primary goal of waste minimization
<p><i>Q-1 What specific waste management policies and programmes are introduced to encourage private sector participation in municipal waste management?</i></p> <p>The Waste and Hazardous Waste Management Road Map which was approved by the National Council for Peace and Order on the 26th of August 2014 and the National Waste Management Master Plan (2016-2021) which was approved by the Cabinet on the 3rd of May 2016, encourages private investors in waste management especially in the waste to energy sector.</p>	
<p><i>Q-2 What are the major waste management areas that have strong involvement of private and business sector?</i> (Please check appropriate boxes and add other areas if not listed below)</p> <p><input type="checkbox"/> waste collection</p> <p><input checked="" type="checkbox"/> resource recovery</p> <p><input type="checkbox"/> waste recycling</p> <p><input checked="" type="checkbox"/> waste to energy, composting, etc.</p> <p><input type="checkbox"/> PPP projects in waste sector</p>	
<p><i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i></p> <p>PPP Projects exceeding 1,000 million THB must comply with Public Private Partnership Act which has many procedural steps and requires time to receive approval.</p>	
<p><i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i></p> <p>Lampang city municipality contracts out their waste collection process. Phuket City municipality has a PPP project for their waste incinerator. Hadyai City municipality has a PPP project for their waste gasification. www.dla.go.th, www.ppp.sepo.go.th</p>	
<p><i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i></p> <p>The Act on Maintaining the Country Cleanliness and Tidiness (2016 version) and Law for Promotion of Public Private Partnership are being reviewed.</p>	
<p><i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all</p>	

I. 3R Goals in Urban/Industrial Areas (3Rs in Industrial waste)	
Goal 5	Encourage the private sector , including small-and medium-sized enterprises (SMEs) to implement measures to increase resource efficiency and productivity , creation of decent work and to improve environmentally-friendly practices through applying environmental standards, clean technologies, and cleaner production.
<p><i>Q-1 What are the major clean technology related policies aiming to increase energy and resource efficiency of SMEs?</i></p> <p>Several Clean technology tools have been introduced to big industries and SMEs not Only to alleviate competitiveness of the production but also conserve the environment at the same time. Under the clean technology project, the data is collected and evaluated systematically in order to find the root cause and best practices available both on the technology and operation practices.</p> <p><i>Q-2 What are the capacity building programmes currently in place to build the technical capacity of SMEs in 3R areas?</i></p> <p>The project has been launched to promote the use of industrial waste and reduction of the amount of waste to landfill which is prescribed to use resources efficient and reduce the environmental impact from the year 2009 by studying the utilization of industrial waste. A part of this project is the 3R training programmes which have been done for 200 participating factories.</p>	
<p><i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i></p> <ul style="list-style-type: none"> - Lack of experts for specifics Industrial/ production - Lack of Financial support for technology alteration 	
<p><i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i></p> <p>The practice of clean production technology has been brought to promote and develop the industrial sector with a total of 17 industrial sectors such as canned pineapple, rubber, milk and milk products, frozen seafood, noodles and rice noodles, Tapioca flour, canned fish, furniture, etc.</p>	
<p><i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i></p> <p>Best Practices on Clean Production Technology in Industries.</p>	
<p><i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all</p>	

I. 3R Goals in Urban/Industrial Areas (3Rs in Industrial waste)	
Goal 6	Promote the greening of the value chain by encouraging industries and associated suppliers and vendors in socially responsible and inclusive ways.
Q-1 What percent of companies and industries have introduced green accounting and voluntary environmental performance evaluation (Ref: ISO 14000)?	
<input type="checkbox"/> Very High (> 90%) <input type="checkbox"/> High (>70%) <input checked="" type="checkbox"/> Average (50--70%) <input type="checkbox"/> Low or not satisfactory (< 50%) <input type="checkbox"/> None	
Q-2 What percent of companies and industries have introduced social accounting (Ref: SA 8000) in consultation with their workers?	
<input type="checkbox"/> Very High (> 90%) <input type="checkbox"/> High (>70%) <input checked="" type="checkbox"/> Average (50--70%) <input type="checkbox"/> Low or not satisfactory (< 50%) <input type="checkbox"/> None	
Q 3 Does government have a programme for promoting greening of the value chain? What specific policies, programmes and incentives are introduced to promote greening of value chain?	
<p>There several Program running by Ministry of Industry such as Green Industry Project, greening the supplied chain incorporation with FTI, Pollution Prevention Program, Cleaner Production and Clean Technology Programs etc. For Ministry of Environmental Resources and Environment also implementing The Green Public Procurement Promotion Plan.</p>	
Challenges (policy/ institutional/ technological/ financial) faced in implementation:	
Lack of integrated policy on sustainable consumption and production.	
Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant	
<p>Green Industry Project http://www.greenindustry.go.th/condition.php?lang=en Green Publish Procurement http://ptech.pcd.go.th/gp/</p>	
Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)	
Green Industry Project, Green Public Promotion Plan Environmental Quality Management Plan.	
Is this Goal relevant for your country? <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

I. 3R Goals in Urban/Industrial Areas (3Rs in Industrial waste)	
Goal 7	Promote industrial symbiosis (i.e., recycling of waste from one industry as a resource for another), by providing relevant incentives and support.
<i>Q-1 Does your government have policies and programmes promoting industrial symbiosis in industrial parks or zones? What specific policies, programmes and incentives are introduced to promote industrial symbiosis?</i>	
<p>The Ministry of Industry by DIW and Industrial Estate Authority of Thailand (IEAT), has made the concept of sustainable development on the principle “Eco”. IEAT has launched the Developing of Eco Industrial Estate & Networks Project (DEE + Net Project) which is collaboration between IEAT and GTZ of Germany on the year 1999-2004. And it was continuously implemented in five pilot estates of the Northeastern Industrial Estate, Bang Pu Industrial Estate, Map Ta Phut Industrial Estate, Eastern Seaboard Industrial Estate and AmataNakorn Industrial Estate.</p>	
<i>Q-2 How many eco-industrial parks or zones or the like, which is supported by the government, are there in the country?</i>	
<p>Eco Town Projects has been developed in 15 provinces focusing on several industrial parks i.e. Rojana Industrial Park, Bang Kra Dee Industrial Park, Sahapat Industrial Park (Sriracha), Sahapat Industrial Park (Kabinburi), 304 Industrial Park and IRPC Industrial Park, etc.</p> <p>In 2015, many projects related eco industrial town had been done, i.e.</p> <ul style="list-style-type: none"> - Preparation of action plans for developing eco industrial area in 15 provinces. - Promotion of social responsibility in eco industrial area. - Establishment of Eco town Center - etc. 	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i>	
Inter-organization cooperation and technical or technological supports.	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i>	
Eco – town Projects: www.diw.go.th , www.ieat.go.th .	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i>	
<p>The Application of Industry-Urban Symbiosis and Green Chemistry for Low Emission and POPs free Industrial Development in Thailand had been submitted to the Global Environmental Fund.</p> <p>GEF OFP had accepted the project and it will be taken into consideration of The GEF council in the next meeting.</p>	
<i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

I. 3R Goals in Urban/Industrial Areas (3Rs in Industrial waste)	
Goal 8	Build local capacity of both current and future practitioners, to enable the private sector (including SMEs) to obtain the necessary knowledge and technical skills to foster green industry and create decent, productive work.
<i>Q-1 How many dedicated training facilities or centers are there to cater the needs of SMEs and practitioners in the areas of cleaner production, resource efficiency and environment-friendly technologies, etc.?</i> Around 3 – 5 universities and foundations.	
<i>Q-2 Please provide an indicative figure on annual government (US \$) expenditure on building technical capacity of SMEs and practitioners in the areas of cleaner production, resource efficiency and environment-friendly technologies, etc.?</i> The project has been done on building technical capacity of SMEs and practitioner in the area of cleaner production, resource efficiency, and environment-friendly technologies, etc. around 2,000,000 \$ per year.	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i> Clean policy dialogue and incentives to promote changes in manufactures.	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i> Cleans production program: www.diw.go.th	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i> Green Industries Plan.	
<i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

**Voluntary Progress/Achievements/Initiatives in
Implementing Ha Noi 3R Declaration (2013~2023)**

Country Name

THAILAND

I. 3R Goals in Urban/Industrial Areas (3Rs in Industrial waste)	
Goal 9	Develop proper classification and inventory of hazardous waste as a prerequisite towards sound management of such waste.
<p>Q-1 Is there a systematic classification of hazardous waste? If so, please attach. <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No The ministry of Industry Notification No.48 (2005) on Industrial Waste Disposal.</p> <p>Q-2 What specific rules and regulations are introduced to separate, store, treat, transportation and disposal of hazardous waste? The Ministry of Industry Notification No.48 (2005) on Industrial Waste Disposal. Hazard Substance Act B.E. 2535 (1992)</p>	
<p>Challenges (policy/ institutional/ technological/ financial) faced in implementation: Institutional cooperation, inspection and monitoring technology.</p>	
<p>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</p> <ul style="list-style-type: none"> - Waste exchange : www.thaiwasteexchange.net - Promotion of 3Rs : www.diw.go.th/iwmb/project.asp <p>The Master Plan of Industrial Waste Management.</p>	
<p>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021) The Master Plan of Industrial Waste Management. Industrial waste management plan 2015-2020 (by DIW)</p>	
<p>Is this Goal relevant for your country? <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all</p>	

II. 3R Goals in Rural Areas	
Goal 10	Reduce losses in the overall food supply chain (production, post harvesting and storage, processing and packaging, distribution), leading to reduction of waste while increasing the quantity and improving the quality of products reaching consumers.
<i>Q-1 What specific policies, rules and regulations, including awareness programmes, are introduced to minimize food or crop waste?</i>	
N/A	
<i>Q-2 Is there any continuing education services or awareness programmes for the farmers or agricultural marketing associations on reduction of crop wastes for increased food security?</i>	
N/A	
<i>Q-3 What is the average wastage of crops or agricultural produce between farms to consumers, if there is a study in your country?</i>	
<input type="checkbox"/> Very High (> 20~ 30%) <input type="checkbox"/> High (10~20%) <input type="checkbox"/> Medium (5~10%) <input type="checkbox"/> Low (< 5%) <input type="checkbox"/> Negligible (<1%)	
N/A	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i>	
N/A	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i>	
N/A	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i>	
N/A	
<i>Is this Goal relevant for your country?</i> <input type="checkbox"/> Highly <input checked="" type="checkbox"/> Partially <input type="checkbox"/> Not at all	

II. 3R Goals in Rural Areas	
Goal 11	Promote full scale use of agricultural biomass waste and livestock waste through reuse and/or recycle measures as appropriate, to achieve a number of co - benefits including GHG emission reduction, energy security, sustainable livelihoods in rural areas and poverty reduction, among others.
<i>Q-1 How much amount of – (a) agricultural biomass waste and (b) livestock waste are grossly generated per annum?</i>	
(a) Around 55 million ton per annum (Data as of 2007)	
<i>Q-2 How are most of the agricultural biomass wastes utilized or treated?</i> (Please <u>check all appropriate boxes</u>)	
<input type="checkbox"/> as secondary raw material input (for paper, bioplastic, furniture, etc.) <input checked="" type="checkbox"/> biogas/electricity generation <input checked="" type="checkbox"/> composts/fertilizers <input type="checkbox"/> mostly left unutilized or open dumped <input checked="" type="checkbox"/> mostly open burned	
<i>Q-3 What specific policies, guidelines, and technologies are introduced for efficient utilization of agricultural biomass waste and livestock waste as a secondary material inputs towards full scale economic benefits? Relevant websites could be shared for additional information.</i>	
The National Strategy on Ban of Open – Burning, The National Alternative Energy Plan.	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i>	
Need cost – effective technology for bio – mass utilization and market promotion.	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i>	
Palm tree wastes composting, Biomass incineration for electricity: www.dede.go.th	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i>	
The National Alternative Energy Plan.	
<i>Is this Goal relevant for your country?</i> <input type="checkbox"/> Highly <input checked="" type="checkbox"/> Partially <input type="checkbox"/> Not at all	

III. 3R Goals for New and Emerging Wastes	
Goal 12	Strengthen regional, national, and local efforts to address the issue of waste, in particular plastics in the marine and coastal environment.
<i>Q-1 What specific policies and regulations are in place to address the issue of plastic wastes in coastal and marine environment?</i>	
The Coastal and Marine Environmental Protection Plan, The National Park Act.	
<i>Q-2 What extent issue of plastic waste is considered in integrated coastal zone management (ICZM)? (Please check the appropriate box)</i>	
<input type="checkbox"/> Very much <input checked="" type="checkbox"/> Somehow <input type="checkbox"/> Not at all	
<i>Q-3 Please provide a list of centre of excellences or dedicated scientific and research programmes established to address the impacts of micro-plastic particulates (<5 mm) on coastal and marine species? If yes, please provide relevant websites.</i>	
Plastic Institute Of Thailand: http://www.thaiplastics.org The Thailand Research Fund: http://www.trf.or.th National Metal and Materials Technology Center (MTEC): http://www.mtec.or.th	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i>	
Lack of incentive and technology development on alternative materials.	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i>	
Master Plan on Plastic Waste Management: http://www.pcd.go.th Pilot Project on Plastic Waste Collection in Coastal: http://www.dmcr.go.th	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i>	
National Roadmap for the Development of Bioplastics Industry. Master Plan on Plastic Waste Management.	
<i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

III. 3R Goals for New and Emerging Wastes

Goal 13 Ensure **environmentally-sound management of e-waste** at all stages, including collection, storage, transportation, recovery, recycling, treatment, and disposal with appropriate consideration for working conditions, including **health and safety aspects** of those involved.

Q-1 How do people usually recycle their e-waste (waste electrical and electronic equipment)? (Please check the appropriate box in order of priority by filling in numbers like 1, 2, 3, 4,...etc., for example 1 => Highest priority)

Check if applicable	Number in priority order	
		Take to recycling center / resource recovery facilities
		Take to landfill
		Take to the retailer
✓	4	Take to local charity for re-use
✓	3	Take to second-hand shop for re-use
		Ship back to the manufacturer
		Ship back to the manufacturer
✓	5	Recycle in another country
		Do not know how people dispose

Operations in Thailand (No in schedule)

Sell to junk shops (1)

Storage at home/office (2)

Q-2 What specific policies and regulations are in place to ensure health and safety aspects of those involved in e-waste management (handling/sorting/resource recovery/recycling)?

The Public Health Act of 1992

The Factory Act of 1992

Q-3 How much amount of e-waste is generated and recycled per year?

Type of e-waste	Estimated total volume generated (ton/year)	% of collected by permitted recycler	% of volume recycled in collected
Television	103,610	35.8	N/A
Computer	55,195	18	N/A
Mobile phone	1,658	N/A	N/A
Refrigerators	64,540	15.4	N/A
Washing machines	60,282	15	N/A
Air conditioners	73,469	27.5	N/A
Others...		N/A	N/A
- Digital Cameras	188		
- DVD/CD players	17,859		

* Recycler is junk shop

Challenges (policy/ institutional/ technological/ financial) faced in implementation:

Lack of modern WEEE management facilities.

Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant

Drafted E - Waste Management Law. Voluntary Program on E – Waste Collection.

www.pcd.go.th

III. 3R Goals for New and Emerging Wastes	
Goal 13	Ensure environmentally-sound management of e-waste at all stages, including collection, storage, transportation, recovery, recycling, treatment, and disposal with appropriate consideration for working conditions, including health and safety aspects of those involved.
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i> National WEEE Management Strategic Plan, E-Waste Management Law.	
<i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

III. 3R Goals for New and Emerging Wastes	
Goal 14	Effective enforcement of established mechanisms for preventing illegal and inappropriate export and import of waste, including transit trade, especially of hazardous waste and e-waste.
<i>Q-1 What specific policies and regulations are introduced to prevent illegal import and export of e-waste?</i> According to Notification of Department Industrial Works on the condition imposed on import permission of chemical wastes, listed hazardous substance, into the Kingdom of Thailand, dated on 26 May 2000, Imported e-waste that is designated as hazardous substances are permitted to be used as a raw material in a factory only Its import for commercial purpose (e.g. sell or distribute) is prohibited	
<i>Q-2 Do you have required number of well-trained custom or other officials(for airport, sea-port, land border control, etc.) to track illegal export and import of e-waste?</i> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i> - False declaration - Misunderstanding about hazardous waste/e-waste is a raw material - Related authorities have limitations on skill and tools for hazardous waste analysis.	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i> Annual technical training workshop on identification and monitoring of hazardous waste and e-waste transboundary movement from the year 1991 until now	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i> According to the National Integrated WEEE Management Strategic Plan (Phase II) for the year 2014-2020, strengthening import-export control procedure is one of the government's strategy to preventing illegal import and export of hazardous waste and e-waste	
<i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

III. 3R Goals for New and Emerging Wastes	
Goal 15	Progressive implementation of “ extended producer responsibility (EPR) ” by encouraging producers, importers, and retailers and other relevant stakeholders to fulfill their responsibilities for collecting, recycling, and disposal of new and emerging waste streams, in particular e-waste.
<p><i>Q-1 What specific Extended Product Responsibility (EPR) policies are enacted or introduced? (If there is none, then skip Q-2 below)</i></p> <p>Drafted Act on the Management of Waste Electrical and Electronic Equipment B.E.</p> <p><i>Q-2 Please provide a list of products and product groups targeted by EPR nationally?</i></p> <p>Potential products targeted by EPR include television, air conditioner, refrigerator, computer/notebook, mobile phone, dry cell batteries.</p>	
<p><i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i></p> <ul style="list-style-type: none"> - Computing amount of E-waste quantity and recovery by informal collectors and recycling - Public awareness of e-wastes issues - Limited number of licenses recycle, collection outer (including those provided by municipalities) <p>(Draft out is not yet effective)</p>	
<p><i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i></p> <p>Pilot Project on E-wastes Collection and Recycling (under developing): www.pcd.go.th</p>	
<p><i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i></p> <p>National Integrated Waste Electrical and Electronic Equipment Management Strategy 2014-2021</p>	
<p><i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all</p>	

III. 3R Goals for New and Emerging Wastes	
Goal 16	Promote the 3R concept in health-care waste management.
<i>Q-1 What specific policies and regulations are in place for healthcare waste management?</i> The Public Health Ministry: Notification on Infectious Waste Management	
<i>Q-2 What is the total annual government expenditure towards healthcare waste management (US\$ per year)?</i> N/A	
<i>Q-3 List the agencies or authorities responsible for healthcare waste management.</i> Department of Health, Ministry of Public Health	
<i>Q-4 What is the common practice for disposal of healthcare wastes?</i> (Please check the appropriate box and add if any other practice followed) <input type="checkbox"/> open dumping (untreated) <input type="checkbox"/> open burning (untreated) <input checked="" type="checkbox"/> ordinary landfilling (untreated) <input type="checkbox"/> sanitary landfilling (treated) <input checked="" type="checkbox"/> Low cost small scale incineration (do not meet air emission standards) <input type="checkbox"/> Highly controlled air incineration (dedicated/modern medical waste incinerators) <input type="checkbox"/> Other methods (please specify names:)	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i> Lead among ASEAN on Health Promotion, cost – effective technology for health care waste.	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i> Pilot project on health care wastes separation and collection: www.anamai.moph.go.th	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i> National Strategy Plan on Environment and Health.	
<i>Is this Goal relevant for your country?</i> <input type="checkbox"/> Highly <input checked="" type="checkbox"/> Partially <input type="checkbox"/> Not at all	

IV. 3R Goals for Cross-cutting Issues	
Goal 17	Improve resource efficiency and resource productivity by greening jobs nation - wide in all economic and development sectors.
<i>Q-1 What specific policies and guidelines are introduced for product standard (towards quality/durability, environment/eco-friendliness, labour standard)?</i> Guidelines and criteria for product standard, Promotion for government green procurement.	
<i>Q-2 What specific energy efficiency schemes are introduced for production, manufacturing and service sector?</i> Government energy saving plan and Energy efficiency label on home appliances.	
<i>Q-3 What specific policies are introduced to create green jobs in product and waste sector?</i> Green Industry Policy. Government Green Procurement and Green label Schemes.	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i> Need incentives for manufacture changes.	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i> Green products and Services for government, Green label products. http://www.pcd.go.th and www.tei.or.th/	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i> Government Green Procurement Policy and Green Industrial Policy	
<i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

IV. 3R Goals for Cross-cutting Issues	
Goal 18	Maximize co-benefits from waste management technologies for local air, water, oceans, and soil pollution and global climate change.
<i>Q-1 Please share how climate mitigation is addressed in waste management policies and programmes for co-benefits?</i>	
<ul style="list-style-type: none"> - Linkage of municipal solid waste management to GHG reduction – improving recycling efficiency reduction of open – burning and dumping. - Apply technologies for landfill gases reduction and recovery. 	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i>	
<ul style="list-style-type: none"> - Clear Benefits of reduction GHG or climate mitigation from waste management. - Need to change conventional solid waste disposal to a modern technology. 	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i>	
<ul style="list-style-type: none"> - GHG mitigation by municipal organic waste composting - Improving open – dumping site plan. - Pilot project on semi-aerobic landfill at Nakronratchasima Province: http://www.pcd.go.th 	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i>	
Thailand GHG Mitigation Plan.	
<i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

IV. 3R Goals for Cross-cutting Issues	
Goal 19	Enhance national and local knowledge base and research network on the 3Rs and resource efficiency , through facilitating effective and dynamic linkages among all stakeholders, including governments, municipalities, the private sector, and scientific communities.
<i>Q-1 What specific policies are introduced to encourage triangular cooperation between government, scientific & research institutions and private/business sector in 3R areas?</i>	
National Policy on Science and Technology and R&D development plan. - Thailand Institute of Science and Technological Research (TISTR): Waste minimization, material research.	
<i>Q-2 Please share the number and list of dedicated scientific institution, or coordinating centers in the areas of 3Rs (e.g., waste minimization technologies, eco-products, cleaner production, recycling technologies, industrial symbiosis, resource efficiency, etc.)?</i>	
- PCD : 3R and waste minimization eco – products - DIW : Cleaner Production, Industrial symbiosis recycling technology, resource efficiency - TEI : Sustainable production and consumption, green label) environmental labeling. - Kasetsart University: LCA, green economy and CT/CP programme	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i>	
- Limitation of experts or researchers. - Incentives for R&D.	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i>	
- Research and study on packaging and e-waste recovery, www.pcd.go.th - CT/CP programme for industrial sectors, www.diw.go.th	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i>	
The National Sustainable Development Policy, The National Environment Basic plan, and The National 3R Strategy.	
<i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

IV. 3R Goals for Cross-cutting Issues	
Goal 20	Strengthen multi-stakeholder partnerships among governments, civil society, and the private sector in raising public awareness and advancing the 3Rs, sustainable consumption and production, and resource efficiency, leading to the behavioural change of the citizens and change in production patterns.
<p>Q-1 Does central government have official dialogue with multi-stakeholders in the process to formulate 3R-related policies and regulations? Which stakeholders are involved in the dialogue? (Please check all applicable)</p> <p> <input checked="" type="checkbox"/> NGOs <input checked="" type="checkbox"/> Industrial Association <input checked="" type="checkbox"/> Local Government <input checked="" type="checkbox"/> Academic Institution <input type="checkbox"/> Others, please add/specify () </p>	
<p>Q-2 What is the level of NGOs' involvement in 3R, sustainable production and consumption, resource efficiency related promotional activities? (Please check the appropriate box)</p> <p> <input type="checkbox"/> Very high <input checked="" type="checkbox"/> Moderate <input type="checkbox"/> Low <input type="checkbox"/> Almost Negligible </p>	
<p>Q-3 What is the level of citizens' awareness on beneficial aspects of 3R, sustainable production and consumption and resource efficiency. (Please check the appropriate box)</p> <p> <input type="checkbox"/> Very high <input checked="" type="checkbox"/> Moderate <input type="checkbox"/> Low <input type="checkbox"/> Almost Negligible </p>	
<p>Challenges (policy/ institutional/ technological/ financial) faced in implementation: Awareness raising needs financial support and small market of green products because of price competitiveness, personal perception, and lack of quality standards for customers.</p>	
<p>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant Green Public Procurement Promotion Plan, 2013-2016 http://ptech.pcd.go.th/gp/</p>	
<p>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021) Continuation Of Green Public Procurement Promotion Plan 2017 -</p>	
<p>Is this Goal relevant for your country? <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all</p>	

IV. 3R Goals for Cross-cutting Issues	
Goal 21	Integrate the 3Rs in formal education at primary, secondary, and tertiary levels as well as non-formal education such as community learning and development, in accordance with Education for Sustainable Development.
<i>Q-1 Provide a list of formal programmes that addresses areas of 3R and resource efficiency as part of the academic curriculum?</i>	
<ul style="list-style-type: none"> - Mining programme - Environment science - Environmental engineering programme - Environmental technology programme 	
<i>Q-2 Please provide an overview of the Government policies and programmes to promote community learning and development (non-formal education) on 3R and sustainable waste management.</i>	
The Roadmap for Municipal Solid Waste Management provide a strategy addressed on environmental education, public awareness raising, public participation programmes	
<i>Q-3 Please provide a list of academic and research institutions offering PhD programmes in the areas of 3Rs and resource efficiency?</i>	
<ul style="list-style-type: none"> - Asian Institute of Technology - Kasetsart University - Chulalongkorn University - Mahidol University - Chiang Mai University 	
<i>Q-4 Please provide a list of management institutions (offering BBA / MBA courses) which have integrated resource efficiency and life cycle assessment (LCA) as part of their curriculum or course development?</i>	
- Kasetsart University– The National Institute of Development Administration (NIDA)	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i>	
Limitation on know how to develop environmental education programme.	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i>	
Integrated 3R and solid waste management into environmental education at school and universities	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i>	
The National Basic Environmental Plan and the National Solid Waste Management Master Plan.	
<i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

IV. 3R Goals for Cross-cutting Issues	
Goal 22	Integrate the 3R concept in relevant policies and programmes, of key ministries and agencies such as Ministry of Environment, Ministry of Agriculture, Forestry and Fisheries, Ministry of Industry, Ministry of Trade and Commerce, Ministry of Energy, Ministry of Water Resources, Ministry of Transport, Ministry of Health, Ministry of Construction, Ministry of Finance, Ministry of Labour, Ministry of Land and Urban Development, Ministry of Education, and other relevant ministries towards transitioning to a resource-efficient and zero waste society.
<i>Q-1 Please list the name of the Ministries and major Government Agencies which are promoting 3R and resource efficiency as part of their policy, planning and developmental activities at local and national level.</i>	
<ul style="list-style-type: none"> - Ministry of National Resources and Environment - Ministry of Public Health - Ministry of Education - Ministry of Industry - Ministry of Interior - Ministry of Energy - Ministry of Finance 	
<i>Q-2 What type of coordination mechanism are there among ministries and agencies for a resource efficient economic development?</i>	
<input checked="" type="checkbox"/> Official regular coordination meeting among ministries and agencies <input checked="" type="checkbox"/> Official ad-hoc coordination meeting among ministries and agencies <input type="checkbox"/> Informal meeting among ministries and agencies <input type="checkbox"/> Other coordination mechanisms (please add/specify)	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i>	
Challenges in cooperation among relevant ministries, limitation on ministry authority and knowledge.	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i>	
<ul style="list-style-type: none"> - Green Industry Programme : www.diw.go.th - Alternative energy from wastes policy : The Department of Alternative Energy Development and Efficiency : www.dede.go.th - Environmental education program : www.moe.go.th 	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i>	
The National Environmental Management Plan and the National Solid Waste Master Plan.	
<i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

IV. 3R Goals for Cross-cutting Issues	
Goal 23	Promote green and socially responsible procurement at all levels, thereby creating and expanding 3R industries and markets for environmentally-friendly goods and products.
<p><i>Q-1 What specific policies are introduced to promote green and social responsible procurement?</i> Green Public Procurement Promotion Plan 2008-2011 and continue to 2013-2016 approved by the Cabinet Resolution on 22 January 2008</p> <p><i>Q-2 Please provide details of eco-labelling schemes of your country.</i> Green Label operates by Thai Environment Institute (TEI)</p> <p><i>Q-3 Please provide a list of criteria for eco-labeled products and services in your country.</i> Typical criteria base on performance standard as common criteria plus environment concern criteria can be found on http://www.tei.or.th/greenlabel/thcategories.html</p> <p><i>Q-4 Please provide the list of Ministries and major Government Agencies which have adopted green procurement policy.</i> All ministries and central government agencies (170 Agencies) and around 670 Local Authority</p> <p><i>Q-5 What % of municipalities have adopted the green procurement policy?</i> Around 28% As of June 2016</p>	
<p><i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i> Being GPP implementation and monitoring on voluntary basis, low response rate have shown with the result of a misrepresentation of actual level of procurement of green products and services. The lack of centralized purchases and/or procurement platform with green product and service databases requires each implementing agency to track their own GPP data to report which cause time consuming and reluctant to report the result.</p>	
<p><i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i> - Green Public Procurement Promotion Plan 2008-2011, 2013-2016 http://ptech.pcd.go.th/gp - Thai eco labeling http://tei.or.th/greenlabel/thcategories.html.</p>	
<p><i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i> Green Public Procurement Promotion Plan 2017-2021 is under developing by related stakeholder.</p>	
<p><i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all</p>	

IV. 3R Goals for Cross-cutting Issues	
Goal 24	Phase out harmful subsidies that favour unsustainable use of resources (raw materials and water) and energy, and channel the freed funds in support of implementing the 3Rs and efforts to improve resource/energy efficiency.
<i>Q-1 Are there any government subsidy programmes that directly or indirectly favour unsustainable use of resources (raw materials, water, and energy)? If so, please provide a list of such programmes along with the responsible Ministry or Agency administering and implementing it.</i>	
N/A	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i>	
N/A	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i>	
N/A	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i>	
N/A	
<i>Is this Goal relevant for your country?</i> <input type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

IV. 3R Goals for Cross-cutting Issues	
Goal 25	Protect public health and ecosystems, including freshwater and marine resources by eliminating illegal activities of open dumping, including dumping in the oceans, and controlling open burning in both urban and rural areas.
<i>Q-1 Is waste management a public health priority in your country?</i>	
Yes	
<i>Q-2 What are the rules and regulations to prevent open dumping and open burning of waste?</i>	
The Waste and Hazardous Waste Management Road Map and Master Plan which was approved by the National Council for Peace and Order on the 26th of August 2014, calls for an end to improper disposal methods such as open dumping.	
<i>Q-3 Rank the five most important rivers in terms of water quality (BOD values) passing through major cities and urban areas?</i>	
1. Chaophraya river 2. Thachin river 3. Phangrad river 4. Lopburi river 5. Pechburi river	
<i>Q-4 What are the specific laws, rules and regulations in place to prevent littering in river and water bodies?</i>	
- The Public Cleansing Act B.E. 2535 Article 26, 29-34: Prohibits the disposal of waste in public areas. - The Act of Navigation in Thai Water.	
<i>Q-5 What are the specific laws, rules and regulations in place to prevent marine littering?</i>	
- The Act of Sea Resources and Coastal Management.	
Challenges (policy/ institutional/ technological/ financial) faced in implementation:	
Need cooperation among related ministries.	
Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant	
- The Waste and Hazardous Waste Management Road Map http://www.pcd.go.th/Info_Serv/roadmapWaste.html (in Thai language) - The National Waste and Hazardous Waste Management Master Plan (2016-2021) http://www.pcd.go.th/Download/file/waste/WasteMasterPlan.pdf (in Thai language) - The Act on Maintaining the Country Cleanliness and Tidiness (2016 version): www.dla.go.th - Pilot project on plastic waste collection: www.dmcg.go.th	
Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)	
- The Act on Maintaining the Country Cleanliness and Tidiness (2016 version) is being reviewed - The Waste Management Act is being drafted. - The Department of Marine and Coastal Resources is recently tasked with the responsibility to manage waste in marine waters	
Is this Goal relevant for your country? <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

IV. 3R Goals for Cross-cutting Issues	
Goal 26	Facilitate the international circulation of re-usable and recyclable resources as well as remanufactured products as mutually agreed by countries and in accordance with international and national laws, especially the Basel Convention, which contributes to the reduction of negative environmental impacts and the effective management of resources.
Q-1 What are major recycling industries in your country?	
<ul style="list-style-type: none"> - Factory type 101(Central Waste treatment) - Factory type 105 (sorting and/or landfill facility of waste) - Factory type 106(recycling facility in which unusable industrial products wastes being utilized in production process to produce raw material or new product) 	
Q-2 Please specify the regulation on transboundary movement of hazardous waste.	
According to the Hazardous Substance Act B.E. 2535 (1992), hazardous waste be classified to Hazardous Substance Type 3 which obtain permission before specified actions. The importer – exporter shall submit an application for a permit for Type 3 hazardous substance to Department of Industrial work (DIW) Ministry of Industry.	
Q-3 If your government has restriction on import of non-hazardous waste or quality control of non-hazardous waste, please list it up.	
<ul style="list-style-type: none"> - Plastic wastes (Apply to the Notification of Ministry of Industry on the criteria for the approval of the import of the scrap and used material which is made of used plastic and unused plastic B.E. 2551 (2008) dated on 21 January 2008 - Used tyres (Apply to the Notification of Ministry of commerce on the importation of used tyres into Thailand B.E. 2556 (2013) dated on 16 August 2013 	
Q-4 Does your government restrict import of remanufactured goods?	
Some goods which many impact to society, health and environment.	
Q-5 Does your government regard remanufactured goods as secondhand goods, and regulate it as secondhand goods?	
Yes.	
Challenges (policy/ institutional/ technological/ financial) faced in implementation:	
Need specific law and regulation for transboundary movement of wastes, recyclables and goods.	
Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant	
Goods control for impart and export: www.costoms.go.th , www.pcd.go.th , www.diw.go.th .	
Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)	
Transboundary movement of wastes under the Basel Convention Agreement.	
Is this Goal relevant for your country? <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

IV. 3R Goals for Cross-cutting Issues

Goal 27 Promote data collection, compilation and sharing, public announcement and application of statistics on wastes and the 3Rs, to understand the state of waste management and resource efficiency.

Q-1 Please give an overview on availability of various data and information on material flow and waste management by checking (X or ✓) the appropriate boxes. (Please respond on both "Data Availability" and Monitoring Base")

Data Type	Data Availability			Monitoring Base	
	Good	Very limited	No data exist	Good	Not good
Waste generation		✓			✓
Material flow	✓				✓
Cyclical use			✓		✓
Amount of final disposal	✓			✓	
Disposal to land	✓			✓	
Direct disposal to water		✓			✓
Import of waste	✓			✓	
Export of waste	✓			✓	
Total landfilled waste	✓			✓	
Import of recyclables		✓			✓
Export of recyclables	✓				✓
Hazardous waste generation (solid, liquid, sludge, etc.)		✓			✓
e-waste generation	✓				✓

(Please add any other data type relevant to your country)

Q-2 What are the current and planned government policies and programmes to strengthen data and information availability in waste sector?

Public Discloses Policy/ Environmental Promotion Programme.

Challenges (policy/ institutional/ technological/ financial) faced in implementation:

- Data collection and sharing need high budget.
- Different data collection techniques and capability.

Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant

- Municipal solid waste management data collection for annual report of pollution status : www.pcd.go.th

Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)

- 3R data base and knowledge hub development

Is this Goal relevant for your country? Highly Partially Not at all

IV. 3R Goals for Cross-cutting Issues	
Goal 28	Promote heat recovery (waste-to-energy), in case wastes are not re-usable or recyclable and proper and sustainable management is secured.
<i>Q-1 What are the government policies and programmes, including incentives, for waste-to-energy programmes?</i>	
Waste and Hazardous Waste Management Road Map encourages waste to energy facilities as part of an integrated waste management system for local authorities with public-private partnerships approach.	
A new feed in tariff system has been introduced for driving production of energy from waste.	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i>	
Procedures for public private partnerships for waste to energy projects need to be simplified and explained to local authorities.	
Inadequate numbers of local higher technology providers.	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i>	
1. Waste and Hazardous Waste Management Road Map http://www.pcd.go.th/Info_Serv/roadmapWaste.html (in Thai language)	
2. Undergoing a project to conduct feasibility studies for waste to energy facilities in Thailand for large, medium and small size.	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i>	
The National Waste and Hazardous Waste Management Master Plan (2016-2021) is being drafted	
<i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

IV. 3R Goals for Cross-cutting Issues	
Goal 29	Promote overall regional cooperation and multi-stakeholder partnerships based on different levels of linkages such as government-to-government, municipality-to-municipality, industry-to-industry, (research) institute-to-institute, and NGO-to-NGO. Encourage technology transfer and technical and financial supports for 3Rs from developed countries to less developed countries.
<i>Q-1 Please provide a list of on-going bilateral/multi-lateral technical cooperation in 3R areas?</i>	
<ul style="list-style-type: none"> - ASEAN-UNEP IETC Joint Activities on Waste Management Under ASEAN Working Group on Multilateral Environmental Agreement (AWGMEA) - Capacity Building Project on Environmental Management Among Local Regional And Central Authorities :JICA 	
<i>Q-2 What actions are being taken to promote inter-municipal or regional cooperation in areas of waste exchanges, resource recovery, recycling, waste-to-energy and trade of recyclables?</i>	
<ul style="list-style-type: none"> - Developing master plan on solid and hazardous wastes management which include international cooperation 	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i>	
N/A	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i>	
<ul style="list-style-type: none"> - Waste Landfill Planing Assistance for Thailand : JICA, Fukuoka. 	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i>	
<ul style="list-style-type: none"> - The National Waste Management Master Plan 2016-2021 	
<i>Is this Goal relevant for your country?</i> <input checked="" type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

IV. 3R Goals for Cross-cutting Issues	
Goal 30	Pay special attention to issues and challenges faced by developing countries including SIDS in achieving sustainable development.
<i>Q-1 Please describe any past and on-going cooperation with SIDS (Small Island Developing States) countries in 3R areas.</i>	
-	
<i>Q-2 Please list 3R related projects linked to climate change, biodiversity, disaster management and sustainable tourism. (This is <u>to be reported by SIDS countries only</u>)</i>	
-	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i>	
-	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i>	
-	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i>	
-	
<i>Is this Goal relevant for your country?</i> <input type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

IV. 3R Goals for Cross-cutting Issues	
Goal 31	Promote 3R + “Return” concept which stands for Reduce, Reuse, Recycle and “Return” where recycling is difficult due to the absence of available recycling industries and limited scale of markets in SIDS, especially in the Pacific Region.
<i>Q-1 What specific policies, programme, including pilot projects, are implemented to promote 3R+ “Return” concept? (This is to be reported by SIDS countries only)</i>	
-	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i>	
-	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i>	
-	
<i>Important policies/programmes/projects/master plans the government plans to undertake within next five years (2016~2021)</i>	
-	
<i>Is this Goal relevant for your country?</i> <input type="checkbox"/> Highly <input type="checkbox"/> Partially <input type="checkbox"/> Not at all	

IV. 3R Goals for Cross-cutting Issues	
Goal 32	Complete elimination of illegal engagement of children in the informal waste sector and gradually improve the working conditions and livelihood security, including mandatory provision of health insurance , for all workers.
<i>Q-1 What is the approximate market size (in US\$) of the informal waste sector?</i> Approximately 650,000 USD	
<i>Q-2 Number of annual labor inspections in waste sector?</i> Around 100,000 people	
<i>Q-3 Is health insurance a mandatory to all informal workers in waste sector by law?</i> Only registered waste recycling companies.	
<i>Q-4 What specific policies and enforcement mechanisms are in place to prevent illegal engagement of children in waste sector?</i> - Labor law and related notifications - Measures in Prevention and Suppression of Trafficking in Women and Children Act BE 2540 (1997) - Child Protection Act BE 2546 (2003)	
<i>Q-5 Number of landfill sites accessible to register waste pickers?</i> N/A	
<i>Q-6 Average life span of informal waste workers?</i> N/A	
<i>Q-7 Any government vaccination programmes for informal waste workers?</i> Yes , Local authority and the public health units	
<i>Q-8 Any public awareness programmes for informal waste workers on health and safety measures?</i> Yes, running by local authority on green junk shop programs.	
<i>Challenges (policy/ institutional/ technological/ financial) faced in implementation:</i> - Register informal waste sectors for supporting welfare - Manatory provision of health insurance is limited by finance and related laws.	
<i>Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant</i> - Promotion for green junk shops : www.pcd.go.th - Promotion health care for informal labor : website http://www.thaihealth.or.th/	
<i>Important policies/programs/projects/master plans the government plans to undertake within next five years (2016~2021)</i> Master Plan on National Health Care and Insurance.	
<i>Is this Goal relevant for your country?</i> <input type="checkbox"/> Highly <input checked="" type="checkbox"/> Partially <input type="checkbox"/> Not at all
