

UNCRD-UNEP-CCET Special Lunch Session

Waste Management Guidelines Development

8th Regional 3R Forum in Asia and the Pacific

10th April 2018, VEDA at Ground Floor, Indore, India (13:30 – 14:30)

In order to assist the policy makers and practitioners at city government-levels to select and implement appropriate waste management policies and technologies for improving the waste management systems, CCET aims to develop a series of waste management guidelines on the selected waste management technologies. The highlights of this series is (1) developed on “resource perspective” instead of “waste treatment perspective”; (2) toward social implementation; (3) based on good practices; (4) user-friendly and practical nature. We are here to make a brief introduction about our plan and looking forward to your feedback.

Time	Agenda
13:30 – 13:40	Introduction of the CCET and waste management guidelines activity by Prof. Kazunobu ONOGAWA
13:40 – 13:50	Introduction of the guideline of composting based on Japanese’s case study by Prof. Kosuke KAWAI, NIES
13:50 – 14:00	Introduction of the guideline of mechanical biological treatment based on Thailand’s case study by Dr. Nopparit Sutthasil, NIES
14:00 – 14:30	Open the floor for discussion
